

Routine Restroom Care

Using checklist, assemble all necessary equipment and chemicals onto cart. Place Wet Floor Signs at Restroom door.

Using appropriate PPE, flush toilets and urinals. Remove urinal screens, toilet clips & blocks.

Using your disinfectant cleaner, spray solution into each fixture. Spray on walls, partitions and around urinals. Allow to remain wet while proceeding through other steps.

Using your disinfectant cleaner, spray tops and bottoms of toilet seats. Remember to allow proper dwell time in steps 3-6 as per your disinfectant label instructions.

Mist disinfectant cleaner on shelves, paper towel dispensers, trash cans, partitions, and behind basins.

Spray sink counters, basins and faucet handles with disinfectant cleaner and allow proper dwell time.

Refill all towel, sanitary napkin, tissue, and soap dispensers with your products.

Sweep and pick up paper and trash from floor with broom and dustpan. Spot clean and scrape up heavy soils or sticky substances.

Empty all waste receptacles and replace with appropriately sized plastic can liners where necessary.

Use swab mop to clean interior of toilets and urinals. Use microfiber cloths to wipe down all other disinfected surfaces (see steps 3-6). Start with touch points and use new surface of cloth or new cloth as you proceed through the room.

Spray all mirrors with Glass & Window Cleaner and wipe with a microfiber cloth. If cloth is folded in fourths, you'll have eight clean surfaces to work with.

Replace urinal screens and blocks. Mop the floor with a neutral cleaner. Work backward towards the door. When the floor is dry remove wet floor signs.

Periodic Restroom Tasks

If more aggressive cleaning is needed on fixtures, use an Acid Bowl Cleaner and bowl mop, clean interior of toilets and urinals and flush.

For a deeper basin clean, use Creme Cleanser RTU, scrub basins with a scrubbing pad. Rinse and polish dry with a clean towel.

Use a Stainless Steel Cleaner to clean and polish all metal fixtures.

When completed with your work, always clean all equipment and store neatly for next use.

You may also want to consider advanced air care systems; grout cleaning or sealing; enzyme products to help with odor control; and drain maintenance.
