

Charging Your Wipe Bucket

1. Open the wipe bucket. Add two quarts of product of your choice into the bucket directly to the center of the roll. Please be sure to utilize any Personal Protective Equipment noted on the product label or its Safety Data Sheet. Also, be sure to label the bucket with the Secondary Label of the product you are using.

2. Wipes will be Ready to Use after charging them for two hours. To avoid wipe tearing, pull wipe all the way out through the lid when starting a new roll. Remember to wear the appropriate Personal Protective Equipment. Use on pre-cleaned surfaces. Allow to remain wet for the dwell time stated for the chemical being used and pathogen being targeted.

Usage Tips

- Use chemicals that are purchased ready to use, not through a dilution control system
- Do not charge with chemical until ready to use, and use within 5-7 days
- Store at room temperature or use with product that contains a mold inhibitor

How to Clean, Rinse, and Reuse Buckets

Follow these steps while wearing the proper Personal Protective Equipment to clean bucket between uses if chemical product is being changed.

1. Separate the lid from the bucket. Rinse under warm water.

2. Fill a container with warm water and immerse the bucket.

3. Fill up bucket with warm water, shake side to side, and pour water into the sink. Continue this process until warm water does not show any discoloration.
