

Cold and Influenza (Flu)

Outbreak and infection prevention strategies

The following tips can help you prevent the spread of colds and flu:

- ▶ Use EPA-registered products approved to kill influenza to treat surfaces daily
- ▶ Get vaccinated — everyone 6 months and older should get an annual flu vaccine
- ▶ Wash your hands often, and make hand sanitizing products available for all students and staff
- ▶ Send sick students and employees home so they don't spread the virus

Take These Actions in Schools to Prevent the Spread of Cold and Flu

Use Hand Sanitizer

Disinfect Surfaces Regularly

Cough or Sneeze into Your Sleeve or a Tissue

Stay Home if You Are Sick

Surface Disinfection Protocols

- ▶ Use EPA-registered products approved to kill influenza (check the product label or ask the manufacturer if you are unsure about influenza kill)
- ▶ Disinfect classrooms, common areas, locker rooms, restrooms and food preparation areas daily
- ▶ Disinfect high-touch surfaces in between daily cleans

Disinfectant & Sanitizer
12/32 oz. UPC: 01698
6/64 oz. UPC: 60112

For Regular Disinfection of High-Touch Surfaces

CloroxPro® Clorox® Disinfecting Wipes
Fresh Scent 1/700 ct., UPC: 31547

CloroxPro® Clorox® Disinfecting Wipes
Refill
Fresh Scent 2/700 ct., UPC: 31428

Surface Disinfection Protocols (CONTINUED)

Classrooms and Common Areas

- ▶ Implement an end-of-day deep clean. Disinfect all surfaces daily by using Clorox® Total 360® Sprayer to spray the Clorox® Total 360® Disinfectant Cleaner,
- ▶ Disinfect in between daily deep cleans using an EPA-registered product approved to kill influenza (such as Clorox® Disinfecting Wipes)
- ▶ Focus disinfection on the following high-touch areas: desks and table tops, chairs, door handles, cabinet/drawer handles, light switches, shared classroom equipment, computer keyboards

Desks and Table Tops

Door Handles

Light Switches

Food Preparation Areas

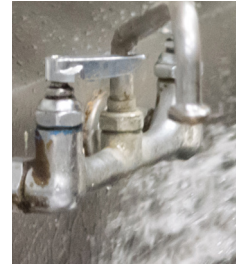

- ▶ Implement an end-of-day deep clean. Disinfect all surfaces daily with the Clorox® Anywhere® Daily Disinfectant & Sanitizer. This food-contact safe disinfectant can be used on eating utensils, glassware, dishes and other surfaces that contact food without requiring a potable water rinse.
- ▶ Focus disinfection on the following areas: food prep surfaces, food trays, faucets, refrigerators, microwaves, tabletops

Food Prep Surfaces

Food Trays

Faucets

Restrooms and Locker Rooms

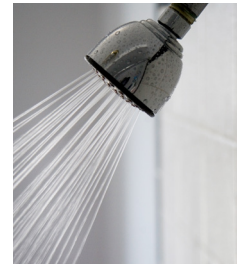

- ▶ Implement an end-of-day deep clean. Disinfect all surfaces daily using the Clorox® Total 360® Sprayer to spray the Clorox® Total 360® Disinfectant Cleaner,
- ▶ Disinfect in between daily deep cleans using an EPA-registered product approved to kill influenza (such as Clorox® Disinfecting Wipes)
- ▶ Focus disinfection on the following high-touch areas: light switches, sinks, toilets, faucets, door handles, faucets, countertops, stall partition walls/doors, towel/soap dispensers, showers

Sinks

Toilets

Showers

How to Disinfect Surfaces with the Clorox® Total 360® System

Directions for Use

Follow a continuous path through the area to be treated, working from high to low areas and moving the sprayer in a sweeping motion until surfaces are thoroughly wet. Allow surfaces to air dry. If streaking is observed, wipe with a clean, damp cloth.
