DEALING WITH CORONAVIRUS ON COMMON SURFACES - FOOD PREP SURFACES

FREQUENCY OF CLEANING & DISINFECTING

Clean & disinfect food prep areas every 30 minutes or as needed.

PRODUCTS & TOOLS NEEDED

- Cleaning agent that is appropriate for the surface being cleaned and soils being removed. To find the appropriate product contact your TMA/Chemnet Systems representative or go to: chemnet-systems.com
- Clean towel <u>used for cleaning only</u> to prevent cross contamination.
- Disinfecting agent that is listed on the Environmental Protection Agency's (E.P.A.) <u>List N:</u> <u>Disinfectants for Use Against SARS-CoV-2, the virus that causes COVID-19</u>. The easiest way to locate your product on this list is to enter the first two sets of its E.P.A. registration number, located on the product label, into the search bar. For example, TMA/Chemnet Systems Complete RTU Bowl & Bath Disinfectant's E.P.A. registration number is 1839-220-70053, so you would search 1839-220 to find it on the list.
- Disinfecting towel <u>used for disinfecting only</u> to prevent cross contamination.
- Rinse water
- ♦ Rinsing towel *used for rinsing only* to prevent cross contamination.

CLEANING FOOD PREP SURFACES PROCEDURES

- Prepare cleaning agent solution according to manufacturer instructions.
- Scrape debris and food particles into trash can.
- Close food pan storage lids to prevent cleaning agent from coming into contact with food.
- Apply cleaning agent to surfaces being cleaned.
- ♦ Wipe away soils using a clean towel.

DISINFECTING FOOD PREP SURFACES PROCEDURES

- ♦ Areas to be disinfected *must* be thoroughly cleaned prior to being disinfected.
- Prepare disinfecting agent solution according to manufacturers instructions.
- Apply disinfecting agent to surface being disinfected.
- ♦ Allow surface to remain wet for the recommended contact time/dwell time.

Complete RTU Bowl & Bath Disinfectant = 5 minutes

256Worx = 5 minutes

Neutral Lemon Scented Disinfectant = 10 minutes

Quaternary Sanitizer = 10 minutes

- After recommended contact time/dwell time has elapsed, wipe away excess liquid using a disinfecting towel.
- Rinse food contact surface using potable water.
- Wipe away excess water using a designated rinse towel. This is required when using <u>any</u> disinfectant on a food contact surface.

DISINFECTANTS FOR USE ON FOOD PREP SURFACES AGAINST COVID-19

COMPLETE-RTU BOWL & BATH DISINFECTANT E.P.A REGISTRATION NUMBER - 1839-220

A ready to use, E.P.A. registered, neutral disinfectant that can be used on any hard surface. Listed on the E.P.A's List N: Products with emerging viral pathogens and human coronavirus claims for use against SARS-CoV-2, the cause of COVID-19.

COVID-19 Dilution Rate = Ready-To-Use
COVID-19 Contact/Dwell Time = 5 minutes
General Disinfectant Contact/Dwell Time = 2 minutes

256WORX E.P.A REGISTRATION NUMBER - 1839-214

A hospital-grade, neutral disinfectant for use on all hard surfaces. Listed on the E.P.A's List N: Products with emerging viral pathogens and human coronavirus claims for use against SARS-CoV-2, the cause of COVID-19.

COVID-19 Dilution Rate = 0.5 oz / gal
COVID-19 Contact/Dwell Time = 5 minutes
General Disinfectant Contact/Dwell Time = 10 minutes

QUATERNARY SANITIZER E.P.A REGISTRATION NUMBER - 10324-81

A concentrated, E.P.A. registered, food contact surface, no-rinse sanitizer. Listed on the E.P.A's List N: Products with emerging viral pathogens and human coronavirus claims for use against SARS-CoV-2, the cause of COVID-19.

COVID19 Dilution Rate = 0.78 oz / gal
Contact/Dwell time = 10 minutes
General Disinfection Contact/Dwell Time = 10 minutes
